

# Anže Kovač

PLATFORM & INFRASTRUCTURE ENGINEER · SYSTEMS BUILDER

I build systems from application  
code to **infrastructure**.

## EXPERIENCE

Jul 2026 → now  
contract

### Infrastructure Engineer

USBC · YES.WORLD — TOKENISED DEPOSITS, PRE-LAUNCH

- Responsible for the initial infrastructure architecture and provisioning, in a team of three.
- Three environments, each with its own cluster. Kubernetes, Terraform, and the standardised building blocks other teams deploy with.
- Working towards SOC 2 and PCI — not certified yet.

May 2020 → Jul 2026  
6 yrs 3 mos

### DevOps Engineer

GLOBALID · CREDENTIALS AND PRIVACY PLATFORM

- DevOps/SRE on a team that went from six engineers to just me by the end. 200,000+ users at peak.
- Migrated a self-hosted Kubernetes cluster to EKS, rewriting components in Terraform. Three environments, each with its own cluster.
- Built infrastructure modules, including one-click CDN deploys with edge functions. API routing on Envoy and Gloo.
- Delivered monitoring from mobile, web and infrastructure into Datadog, and set up the on-call system.
- Moved CI/CD onto GitHub and infrastructure-as-code onto a managed service.
- Contributed to SOC 2 compliance — the platform was certified.

Jun 2016 → Apr 2020  
3 yrs 11 mos

### Salesforce Developer

AGILCON · PLATINUM SALESFORCE CONSULTING PARTNER

- Lead developer on an AppExchange product.
- Architect for Aura and Lightning Web Components.
- Solution architect and developer on an enterprise contract management system, including its own templating engine.
- Co-authored a low-code HRM platform on Salesforce.
- JS APIs, and the Google Cloud Run services behind them.
- Built and maintained the CI/CD pipelines.
- Led a team of four developers, delivering business applications for companies across Europe.

Aug 2025 → now  
concurrent

### Node Operator — Gonka AI genesis node

FOR HARDYAKA · INVESTMENT COMPANY

- Genesis validator in a decentralised AI compute network. Nodes are there from the first block.
- Cosmos SDK chain and GPU inference node management — hardware and model optimisation and configuration. Running MiniMax M2 and DSV4 Flash on H200 cards.

## EDUCATION

**Bachelor's degree, Computer Science** — University of Ljubljana, Faculty of Computer and Information Science · 2014–2017

## PRODUCTS BUILT AND RUN

**Egglytix** [egglytix.kovac.si](#) LOGIN REQUIRED

Poultry production management for integrators — 2 farms, 11 flocks, ~180,000 birds. Daily production against the breed normative.  
Java · Quarkus · MariaDB · Auth0/OIDC · Qute SSR · Docker

**Rezervnideli.net** [rezervnideli.net](#)

Inventory and customer inquiries for the used car parts market — vehicle selector, search, and inquiries from arrival through to resolution. Java · Quarkus · MariaDB · Qute SSR · REST API · Docker

## TECHNOLOGIES

DAILY

every working day

AWS (EKS · RDS · Route 53 · ACM · Secrets Manager · ECR · CodeArtifact · networking)

Terraform (+ Cloud) · Kubernetes · Helm (+ OCI) · Kong · Envoy · GitHub (Actions · GHCR · API)

CI/CD · Docker · Datadog · Bash · Python · IaC · Redis · OIDC / SSO · OpenAPI · Maven · Claude

WORKING KNOWLEDGE

used, not specialised

Gloo · Knative · Java · Quarkus · MariaDB · API design · Salesforce Platform · OAuth · vLLM · GCP

Cloud Run · Coolify · Unifi Network Manager · Prometheus · Grafana
